**The School of Salamanca**-Thomas Duve 2021 "This book proposes a different perspective and shows, through a knowledge historical approach and several case studies, that the School of Salamanca has to be considered both an epistemic community and a community of practice that cannot be fixed to any individual place. Instead, the School of Salamanca encompassed a variety of different sites and actors throughout the world and thus represents a case of global knowledge production".

**The Italian Difference**-Lorenzo Chiesa 2009 This volume brings together essays by different generations of Italian thinkers which address, whether in affirmative, problematizing or genealogical registers, the entanglement of philosophical speculation and political proposition within recent Italian thought. Nihilism and biopolitics, two concepts that have played a very prominent role in theoretical discussions in Italy, serve as the thematic foci around which the collection orbits, as it seeks to define the historical and geographical particularity of these notions as well their continuing impact on an international debate. The volume also covers the debate around OCyweak thoughtOCO (pensiero debole), the feminist thinking of sexual difference, the re-emergence of political anthropology and the question of communism. The contributors provide contrasting narratives of the development of post-war Italian thought and trace paths out of the theoretical and political impasses of the presentOCOagainst what Negri, in the text from which the volume takes its name, calls OCythe Italian desertOCO."

**The Translation of European Union Legislation. A Corpus-based Study of Norms and Modality**-Francesca Seracini 2020-08-25T00:00:00+02:00 This volume is a study into the norms that come into play in the translation of European Union legislation. With a focus on expressions of modality, the study adopts a corpus-based Descriptive Translation Studies approach to analyse the translation strategies used in a bilingual English/Italian parallel corpus of European Union legislation and identify the most frequent translational patterns. The book outlines the principles at the basis of the multilingual policy at the European Union and provides a detailed outline of the context in which the drafting and translation processes take place as a key to understanding the translational choices. The impact of sometimes contrasting factors such as the conventions of legal drafting at the European Union and those within the target culture, the principle of equal authenticity and the attention to the quality and readability of legislative texts is revealed in the analysis. Evidence in support of the theories concerning translation universals is also found and their implications for EU legal translation are discussed. The results lead to the formulation of several hypotheses as regards the norms governing the translation of EU legislative texts. The book also reflects on the impact that the translational choices have on the development of European Union legal language as an independent variety. This volume will be of interest to researchers and students in the fields of Legal Translation Studies and Linguistics, as well as practising translators.

**The Unknown God**-Deirdre Carabine 2015-01-26 ""This book contains a careful, thorough, and where necessary skeptical as regards doubtful evidence (especially in the case of Plato and the Old Academy) of the beginnings in European thought of the negative or apophatic way of thinking and its relations to more positive or kataphatic ways of thinking about God. One of its greatest strengths, perhaps the greatest, is that the author makes clear that none of the persons concerned, Hellenic, Jewish or Christian, was engaged in the pursuit of a philosophical abstraction, or the heaping of rhetorical superlatives on God. They were rather concerned to present the origin of the universe as an intimately present living reality which infinitely transcends our thought and speech. This, combined with careful attention to the varieties of negative theology and its relations with positive, and the particular difficulties experienced by the members of the various traditions involved, makes the book the best introduction to the negative theology available."" -A. H. Armstrong, Emeritus Professor of Greek, University of Liverpool, England. Emeritus Professor of Classics, Dalhousie University, Halifax, Nova Scotia, Canada. Senior Fellow of the British Academy. Irish academic Deirdre Carabine has lived and taught in Uganda for more than twenty years. She has recently been founder Vice-Chancellor at the Virtual University of Uganda (VUU), the first fully online university in Sub-Saharan Africa. Prior to that she set up International Health Sciences University in Kampala. She has taught at Queen's Belfast, University College Dublin, and Uganda Martyrs University. Currently, she is Director of Programmes at VUU. She attended the Queen's University of Belfast where she graduated with a PhD in philosophy, and University College Dublin where, as one of the first Newman Scholars, she gained a second PhD in Classics. She is also author of John Scottus Eriugena in the Great Medieval Thinkers Series (2000).

**The Unity of Science**-Rudolf Carnap 2013-05-13 As a leading member of the Vienna Circle, Rudolf Carnap's aim was to bring about a "unified science" by applying a method of logical analysis to the empirical data of all the sciences. This work, first published in English in 1934, endeavors to work out a way in which the observation statements required for verification are not private to the observer. The work shows the strong influence of Wittgenstein, Russell, and Frege.

**The New Avant-garde in Italy**-John Picchione 2004-01-01 The debate on literature and the arts provoked by the Italian neoavant-garde (neovanguardia) is undoubtedly one of the most animated and controversial the country has witnessed from World War II to the present. Comprising the period between the late 1950s and the late 1960s, the phenomenon of the neovanguardia involved key writers, critics, and artists, both as insiders - Sanguineti, Balestrini, Guglielmi, Eco, and others - and adversaries such as Pasolini, Calvino, and Moravia. In The New Avant-Garde in Italy - the first book in English to document the movement - John Picchione's objective is twofold: to provide a comprehensive analysis of the theoretical tenets that inform the works of the neovanguardia and to show how they are applied to the poetic practices of its authors. The neovanguardia cannot, Picchione argues, be defined as a movement with a unified program expressed in the form of manifestos or shared theoretical principles. It experiences irreconcilable internal conflicts that are explored as a split between two main blocs - one that is tied to the project of modernity, the other to post-modern aesthetic postures. This study suggests that some of the contentious views proposed by the neovanguardia anticipated a wide range of issues that continue to be significant and pressing to this day.

**Anarchism and eugenics**-Richard Cleminson 2019-05-22 At the heart of this book is what would appear to be a striking and fundamental paradox: the espousal of a 'scientific' doctrine that sought to eliminate 'dysgenics' and champion the 'fit' as a means of 'race' survival by a political and social movement that ostensibly believed in the destruction of the state and the removal of all hierarchical relationships. What explains this reception of eugenics by anarchism? How was eugenics mobilised by anarchists as part of their struggle against capitalism and the state? What were the consequences of this overlap for both anarchism and eugenics as transnational movements?

**Pirandello and His Muse**-Daniela Bini 1998 With sensitive commentary on the letters, Daniela Bini reads the plays the old maestro wrote for the young actress as the sublimation of an erotic impulse he denied throughout his life. From Diana and Tuda to The Mountain Giants, Bini maintains, Pirandello makes love to Marta in the only way he could, the mystical union of the creator and his muse.

**Men and Bears**-AA.VV. 2020-01-23 The time of Carnival represents a "wild" time at the end of winter and pointing to the beginning of a new season. It is characterized by the irruption of border figures, animal masks, characters which recall the world of the dead and which bring within themselves the germ of a vital force, of the energy that produces the reawakening of nature and announces the growth and fertility of the new crops. This wild domain shows itself under the shapes of a contiguity between human and animal: the costumes, the masks, refer to a world in which the characteristics of the human and those of the animal are fused and intertwined. Among these figures, in particular, emerge those of the Wild Man, the human being who takes on animal-like attributes and aspects, and of the Bear, the animal that, more than all the others, gets as close as possible to the human and seems to reflect a deformed image of it. Such symbolic images come from far off times and places to tell a story that belongs to our common origins. The bear assumes attributes and functions alike in very different cultural contexts, such as the Sámi of Finland or North-American hunter-gatherers, and represents a boundary between the world of nature and the human world, between the domain of animals and the difficult construction of humanity: a process continued for centuries, perhaps millennia, and which cannot still be said complete.

**Socrates, or on Human Knowledge**-Simone Luzzatto 2019-08-19 Socrates, Or On Human Knowledge, published in Venice in 1651, is the only work written by a Jew that contains so far the promise of a genuinely sceptical investigation into the validity of human certainties. Simone Luzzatto masterly developed this book as a piece of theatre where Socrates, as main actor, has the task to demonstrate the limits and weaknesses of the human capacity to acquire knowledge without being guided by revelation. He achieved this goal by offering an overview of the various and contradictory gnosiological opinions disseminated since ancient times: the divergence of views, to which he addressed the most attention, prevented him from giving a fixed definition of the nature of the cognitive process. This obliged him to come to the audacious conclusion of neither affirming nor denying anything concerning human knowledge, and finally of suspending his judgement altogether. This work unfortunately had little success in Luzzatto's lifetime, and was subsequently almost forgotten. The absence of substantial evidence from his contemporaries and that of his epistolary have thus increased the difficulty of tracing not only its legacy in the history of philosophical though, but also of understanding the circumstances surrounding the writing of his Socrates. The present edition will be a preliminary study aiming to shed some light on the philosophical and historical value of this work's translation, indeed it will provide a broader readership with the opportunity to access this immensely complicated work and also to grasp some aspects of the composite intellectual framework and admirable modernity of Venetian Jewish culture in the ghetto.

**Social Construction of the Past**-George C. Bond 2020-04-23 First published in 1994. Anthropological and archaeological enquiry are shaped by the historical times in which they are formulated. This collection of essays examines how mainstream scholarship constructs the past - in the case of anthropologists, usually the past of other peoples. By creating another people's cultural history, scholars appropriate it and turn it into a form of domination by one group over another. Mainstream scholarship has often failed to recognize the intellectual and scholarly contribution of subjugated peoples . This volume looks at the way 'postcolonial' scholars are redefining the nature of scholarship, and themselves, in order to develop a more egalitarian discourse. Social Constructions of the Past examines labour, race and gender and its relationship to power and class. It includes essays on a broad range of topics, from the role of intellectuals in restructuring a non-apartheid South Africa, to Haitian working-class women using sexuality to resist domination.

**Commentary on Plato's Gorgias**-Olympiodorus (the Younger, of Alexandria) 1998 This is a modern, annotated translation of antiquity's only extant commentary on Plato's moral and political dialogue "Gorgias," in which the author defends ancient Greek philosophy and culture at a time when Christianity has almost replaced it. **The Postcolonial Museum**-Iain Chambers 2016-02-17 This book examines how we can conceive of a 'postcolonial museum' in the contemporary epoch of mass migrations, the internet and digital technologies. The authors consider the museum space, practices and institutions in the light of repressed histories, sounds, voices, images, memories, bodies, expression and cultures. Focusing on the transformation of museums as cultural spaces, rather than physical places, is to propose a living archive formed through creation, participation, production and innovation. The aim is to propose a critical assessment of the museum in the light of those transcultural and global migratory movements that challenge the historical and traditional frames of Occidental thought. This involves a search for new strategies and critical approaches in the fields of museum and heritage studies which will renew and extend understandings of European citizenship and result in an inevitable re-evaluation of the concept of 'modernity' in a so-called globalised and multicultural world.

**Translation, Adaptation and Transformation**-Laurence Raw 2012-01-12 In recent years adaptation studies has established itself as a discipline in its own right,

separate from translation studies. The bulk of its activity to date has been restricted to literature and film departments, focussing on questions of textual transfer and adaptation of text to film. It is however, much more interdisciplinary, and is not simply a case of transferring content from one medium to another. This collection furthers the research into exactly what the act of adaptation involves and whether it differs from other acts of textual rewriting. In addition, the 'cultural turn' in translation studies has prompted many scholars to consider adaptation as a form of inter-semiotic translation. But what does this mean, and how can we best theorize it? What are the semiotic systems that underlie translation and adaptation? Containing theoretical chapters and personal accounts of actual adaptions and translations, this is an original contribution to translation and adaptation studies which will appeal to researchers and graduate students.

**All'ombra dei Lumi: Jacques-André Naigeon philosophe**-Mario Cosenza 2020-07-29 [Italiano]: Il presente lavoro costituisce una biografia intellettuale di Jacques-André Naigeon (1735-1810), importante figura del secolo dei Lumi francese. Biografo e primo editore di Diderot, Naigeon fu testimone privilegiato delle innumerevoli vicende politiche, sociali e culturali che sconvolsero la società francese. Ateo convinto, editore infaticabile, fine conoscitore della letteratura clandestina, il giovane Naigeon fece in tempo a collaborare agli ultimi volumi dell'Encyclopédie e a partecipare, con il barone d'Holbach, alla propagazione di numerosi scritti eterodossi, materialisti e ferocemente anti-clericali; dopo la Rivoluzione - la quale lo spinse alla riflessione ma non ad un'attività politica propriamente detta - fu integrato dalla cultura "ufficiale" tramite l'elezione presso l'Institut de France: ma nonostante alcuni lavori editoriali di grande pregio, Naigeon resterà esclusivamente la testimonianza vivente di una stagione culturale ormai irripetibile ./[English]:This work aims at being an intellectual biography of Jacques-André Naigeon (1735-1810), an important figure of French Enlightenment. Not only was he very close to Diderot - of whom he was biographer and editor - but he was also a privileged witness of the countless political, social and cultural events that led to the French Revolution. Besides being a convinced atheist, a tireless publisher, a fine connoisseur of Clandestine literature, Naigeon had the opportunity to collaborate in writing the last volumes of the Encyclopédie and to participate in the propagation of heterodox, materialistic and fiercely anti-clerical writings. After the Revolution - at the beginning of which he tried in vain to make himself heard by the Assemblée Nationale - he was then integrated into the "official" culture through the election at the Institut de France: however, even if he is the author of some prestigious works, Naigeon remains exclusively the living testimony of a now unrepeatable cultural season.

**Handbook of Online Learning**-Kjell Erik Rudestam 2002-02-19 The demand for academic coursework and corporate training programs using the Internet and computer-mediated communication networks increases daily. The development and implementation of these new programs requires that traditional teaching techniques and course work be significantly reworked. This handbook consists of 20 chapters authored by experts in the field of teaching in the online environment to adult students enrolled in graduate university degree programs, corporate training programs, and continuing education courses. The book is organized to first lay a conceptual and theoretical foundation for implementing any online learning program. Topics such as psychological and group dynamics, ethical issues, and curriculum design are covered in this section. Following the establishment of this essential framework are separate sections devoted to the practical issues specific to developing a program in either an academic or corporate environment. Whether building an online learning program from the ground up or making adjustments to improve the effectiveness of an existing program, this book is an invaluable resource.--From Amazon.

**Gender and Memory**-Luisa Passerini 2017-07-12 Gender and Memory brings together contributions from around the world and from a range of disciplines--history and sociology, socio-linguistics and family therapy, literature--to create a volume that confronts all those concerned with autobiographical testimony and narrative, both spoken and written. The fundamental theme is the shaping of memory by gender. This paperback edition includes a new introduction by Selma Leydesdorff, coeditor of the Memory and Narrative series of which this volume is a part. Are the different ways in which men and women are recalled in public and private memory and the differences in men's and women's own memories of similar experiences, simply reflections of unequal lives in gendered societies, or are they more deeply rooted? The sharply differentiated life experiences of men and women in most human societies, the widespread tendencies for men to dominate in the public sphere and for women's lives to focus on family and household, suggest that these experiences may be reflected in different qualities of memory. The contributors maintain that memories are gendered, and that the gendering of memory makes a strong impact on the shaping of social spaces and expressive forms as the horizons of memory move from one generation to the next. They argue that in order to understand how memory becomes gendered, we need to travel through the realms of gendered experience and gendered language.

**Otherness in Question**-Livia Mathias Simão 2007-01-01 This book brings to social scientists a new look at how human beings are striving towards understanding others--and through that effort--making sense of themselves. It brings together researchers from all over the World who have suggested a set of new approaches to the basic research issue of how human beings are social beings, while being unique in their personal ways of being. Issues of social representation, communication, dialogical self, and human subjectivity are represented in this book. The book contributes to the contemporary epistemological and ethical debate about the question of otherness, and would be of interest to educationalists, sociologists, psychologists, and anthropologists. It is an invitation to the wide readership to join in this collective effort towards the construction of new conceptions about myselfothers relationships that allow for innovative understanding of various social practices and problem solving in society.

**Beyond Individual and Group Differences**-James T. Lamiell 2003-07-02 Beyond Individual and Group Differences: Human Individuality, Scientific Psychology, and William Stern's Critical Personalism examines the history of psychology's effort to come to terms with human individuality, from the time of Wundt to present day. With a primary emphasis on the contributions of German psychologist William Stern, this book generates a wider appreciation for Stern's perspective on human individuality and for the proper place of personalistic thinking within scientific psychology. The author presents an alternative approach to the logical positivism that permeates traditional psychological thought and methodology making this an innovative, ground-breaking work. Beyond Individual and Group Differences is a dynamic book for academics and scholars in the areas of personality psychology, individual differences, and the history of psychology.

**Many-body Approaches at Different Scales**-G.G.N Angilela 2018-04-25 This book presents a collection of invited research and review contributions on recent advances in (mainly) theoretical condensed matter physics, theoretical chemistry, and theoretical physics. The volume celebrates the 90th birthday of N.H. March (Emeritus Professor, Oxford University, UK), a prominent figure in all of these fields. Given the broad range of interests in the research activity of Professor March, who collaborated with a number of eminent scientists in physics and chemistry, the volume embraces quite diverse topics in physics and chemistry, at various dimensions and energy scales. One thread connecting all these topics is correlation in aggregated states of matter, ranging from nuclear physics to molecules, clusters, disordered condensed phases such as the liquid state, and solid state physics, and the various phase transitions, both structural and electronic, occurring therein. A final chapter leads to an even larger scale of matter aggregation, namely the universe and gravitation. A further no less important common thread is methodological, with the application of theoretical physics and chemistry, particularly density functional theory and statistical field theory, to both nuclear and condensed matter.

**Inescapable Romance**-Patricia A. Parker 2015-03-08 Defining "romance" as a form that simultaneously seeks and postpones a particular end, revelation, or object, Patricia Parker interprets its implications and transformations in the works of four major poets--Ariosto, Spenser, Milton, and Keats. In placing the texts within their literary and historical contexts, Professor Parker provides at once a literary history of romance as genre, a fresh reading of individual poems, and an exploration of the continuing romance of figurative language itself. Originally published in 1979, The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

**A Guide to Neo-Latin Literature**-Victoria Moul 2017-01-16 Latin was for many centuries the common literary language of Europe, and Latin literature of immense range, stylistic power and social and political significance was produced throughout Europe and beyond from the time of Petrarch (c.1400) well into the eighteenth century. This is the first available work devoted specifically to the enormous wealth and variety of neo-Latin literature, and offers both essential background to the understanding of this material and sixteen chapters by leading scholars which are devoted to individual forms. Each contributor relates a wide range of fascinating but now little-known texts to the handful of more familiar Latin works of the period, such as Thomas More's Utopia, Milton's Latin poetry and the works of Petrarch and Erasmus. All Latin is translated throughout the volume.

**Late Modernism**-Tyrus Miller 1999-02-25 Tyrus Miller breaks new ground in this study of early twentieth-century literary and artistic culture. Whereas modernism studies have generally concentrated on the vital early phases of the modernist revolt, Miller focuses on the turbulent later years of the 1920s and 1930s, tracking the dissolution of modernism in the interwar years. In the post-World War I reconstruction and the worldwide crisis that followed, Miller argues, new technological media and the social forces of mass politics opened fault lines in individual and collective experience, undermining the cultural bases of the modernist movement. He shows how late modernists attempted to discover ways of occupying this new and often dangerous cultural space. In doing so they laid bare the ruin of the modernist aesthetic at the same time as they transcended its limits. In his wide-ranging theoretical and historical discussion, Miller relates developments in literary culture to tendencies in the visual arts, cultural and political criticism, mass culture, and social history. He excavates Wyndham Lewis's hidden borrowings from Al Jolson's The Jazz Singer; situates Djuna Barnes between the imagery of haute couture and the intellectualism of Duchamp; uncovers Beckett's affinities with Giacometti's surrealist sculptures and the Bolshevik clowns Bim-Bom; and considers Mina Loy as both visionary writer and designer of decorative lampshades. Miller's lively and engaging readings of culture in this turbulent period reveal its surprising anticipation of our own postmodernity.
