## Brilliant "Wet Look" FLOORS

### GORILLA®

Minimal Burnishing-Harder Finishes

#### The Original Blended Natural Fiber Pad...

that gives a "wet-look" shine. Gorilla® is made with a blend of natural fiber and polyester. This blend uses properties of both fibers to create the most unique and respected floor pad in the world. To clean it, just brush away dried wax with it's die cut center. It will not glaze over.

### JAGUAR® Multiple Burnishing-Medium Finishes

A lighter blend of natural and synthetic fiber than Gorilla®. Designed for more frequent use with highly responsive finishes.

### AQUA PLUS®

Multiple Burnishing-Softer to Medium Finishes

This pad is designed for a burnishing schedule of 3-4 nights per week. It produces a very bright "wet-look" shine with soft to medium finishes. Use Aqua Plus™ under Electric, Battery or Propane machines with ultra high speeds of 1500 to 3000rpm. Aqua Plus™ is made with a light sprinkle of natural fiber.

### Blue-Jay®

Maximum Burnishing-Medium Finishes

A special blend of synthetic and natural fibers in a pad designed for nightly burnishing. This pad will give you an exceptional gloss.

### BlueACE®

Frequent Burnishing-Soft Finishes

With this pad, we created a very soft, dense burnishing pad of fine synthetic fibers to deal with some of the newest finishes on the market. Blue ACE™ is designed for frequent burnishing with battery, electric or propane machines 1000rpm and above.

### GORILLA Lite®

Maximum Burnishing-Soft Finishes

The lightest blend of natural fibers in a synthetic fiber pad for those who use a soft finish that requires nightly burnishing. This pad is designed to give you the same high gloss "wet-look" shine that big brother Gorilla® is known for.

### Superspeed® Rubberized®

Maximum Burnishing-Soft Finishes

A totally synthetic, non-aggressive pad designed for burnishing and polishing with a high speed or ultra high speed floor machine. The rubberized coating creates friction needed to repair softer finishes while removing black marks. The Superspeed Rubberized floor pad will create a high gloss shine.

### 2001® patented

#### Ultra High Speed Burnishing

This is an ultra-high-speed (2000rpm and up) burnishing & spray buffing floor pad of special design. So special that it's patented. It is constructed of two 1/2" floor pads bonded to a stabilizing inner strata. The inner strata stops the elongation and resulting destruction of the pad due to centrifugal force. 2001® pads will of course give you the "wet look" shine, ease of cleaning and all of the other excellent qualities of these floor pads.

2001® pads outlast normal pads on ultra high speed floor machines more than 3 to 1.

THE CURE® SOLVES PROBLEMS.

Use to help cure freshly laid finish as soon as it dries. Perfect for overnight recoats before holiday traffic.

- It's Super-Soft to keep from pulling the finish up.
- It's Strong to stand up under:
  - Propane, Cord Electric or Battery
- It's Flexible to keep from burning uneven floors

# Cleaner, Brighter Floors with ETC Pads

## PREMIUM POLISH/SPRAY BUFF PADS

### RED-SPRAY BUFF

A light abrasive pad for spray buffing to a satin gloss. The fibers are more open to help keep the pad from glazing over.

### TAN-BUFF

A mildly abrasive dry buffing pad for slow speed floor machines. It buffs away light soil and levels scratches for a soft luster.

### WHITE-POLISH

A non-abrasive dry polishing pad for slow speed floor machines. The White-Polish pad will shine your floor to a high luster.

## PREMIUM SCRUB/CLEAN PADS

### GREEN-SCRUB

A medium abrasive pad for wet scrubbing. It removes embedded soil and black marks found in heavy traffic areas.

### BLUE-CLEANER

A medium abrasive pad for spray cleaning. To clean a lightly soiled floor, use this pad with a spray solution.

### RED-LIGHT CLEAN / AUTO SCRUB

For daily use with an automatic scrubber to remove soil without removing finish. Use prior to burnishing.

### RUFF® PAD-SCRUB

ETC's Ruff® Pad is unbeatable for auto-scrubbing and disk scrubbing of abrasive floors, grouted tile floors, terrazzo, poured non-slip floors, concrete floors and other uneven floors that would normally require a brush.

## PREMIUM STRIPPING PADS

### BLACK-STRIP

A very aggressive stripping pad. It is designed to be used to wet strip a floor.

### BROWN-STRIP

An aggressive pad designed for dry stripping floor finish.

## HIGH PERFORMANCE STRIPPING PADS

### RAZORBACK®

The Razorback® pad is a very aggressive pad in problem areas.

### DIAMONDBACK®

The Diamondback® pad is our most extreme abrasive pad. It works extremely well in problem areas with its open weave construction that enables it to hold more load without clogging.

### THE REDWOOD®

ETC's REDWOOD® floor pad is designed to recondition the surface of a wood floor (gymnasiums, parquet areas, etc.) or with its fine abrasive action, will clean or strip a floor needing a new coat of finish. Use with an ETC Red pad to drive it.

All ETC floor pads are available in rectangular sizes.
