

World's First

BRUSH / PAD
for
"RUFF" surfaces

IS IT A BRUSH, OR IS IT A PAD?

ETC's Ruff® Pad Scrubs...

- Rough Surfaces
- Non-slip surfaces
- Grouted floors
- Poured Abrasive floors

Better & Cheaper Than A Brush!

PACKED 4 PER CASE

ETC has just designed the world's first brush/pad to be used for scrubbing and cleaning "ruff" surfaces.

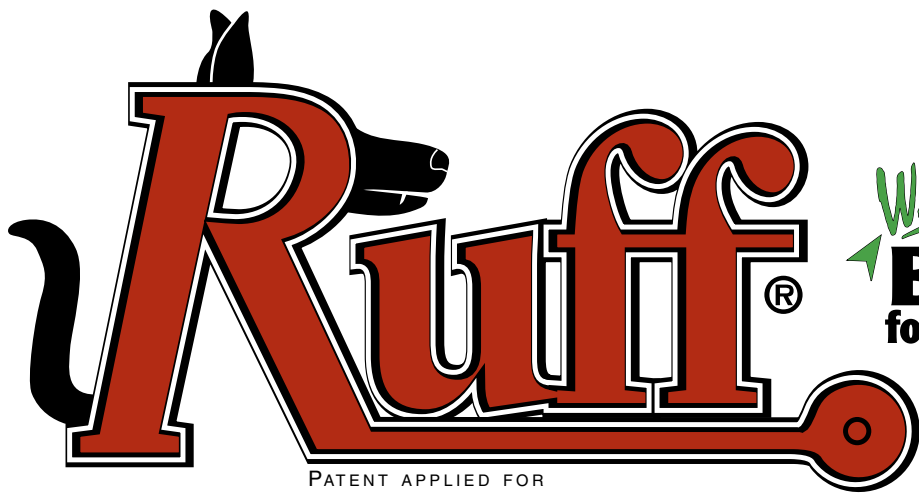

- Thousands of brushes laminated to a floor pad driver.
- Aggressive but not abrasive.
- Serged to secure the edges.
- A pad that goes where only brushes used to go...on rough surfaces that would tear up a floor pad.
- The porous materials allow liquids to pass through to the surface for use with autoscrubbers.
- Ruff® is light weight, flexible, easily switched for regular floor pads and is much less expensive than a brush driver block.
- Ruff® is packed 4 per case and comes in all standard floor pad sizes.
- Ask for Ruff® pads in our Scrub Aid® and Biggy® size hand pads.

PATENT APPLIED FOR

World's First

BRUSH / PAD
for **"RUFF"** surfaces

ETC's Ruff® Pad is unbeatable for auto-scrubbing and disk scrubbing of abrasive floors, grouted tile floors, terrazzo, poured non-slip floors, concrete floors and other uneven floors that would normally require a brush.

Use Ruff® to clean non-slip tile floors with the ease of a light flexible floor pad.

4 PER CASE

Ruff® is made of porous materials that allow liquids to pass through to the surface for use with autoscrubbers.

Use Ruff® when cleaning grouted tile floors instead of expensive brushes.
