

STARDUST® MOP

A great value in an economical dust mop constructed of a synthetic and cotton blend. STARDUST® comes untreated in three colors, red, natural, and blue. The colors available in this dust mopping system make it possible to color code your dust mops for use in specified areas.

Can be used in:

- Hospitals
- Schools
- Super Markets
- Office Buildings
- Department Stores
- Shopping Centers
- Nursing Homes
- And other areas where dust, sand and other abrasive materials must be removed

etc.

ETC of Henderson, Inc.

Tough, Durable, Economical

This new innovative dust control mop from ETC combines durability with outstanding value. A superb quality of specially blended yarn, makes the Stardust[®] mop line ideal for all demanding applications. Professionally designed, the Stardust[®] mop dust control system will satisfy your color coding needs. The Stardust[®] mop line is available in natural, blue and red colors and in all standard sizes (12", 18", 24", 30", 36").

The synthetic backing is extra durable and dries quickly. It also features a snap closure on one end.

For the best total dust control, treat your Stardust[®] mops with ETC's paraffin based Foaming dust mop treatment or ETC's Dustreat[®] liquid dust mop treatment. Treated dust mops will pick up dust and dirt that untreated mops leave behind.

etc.
