

"The Mop Just Glides Across the Floor As I Apply The Finish."

New!
Redesigned

U.S. Patent #6,023,809

Great White®

Flat Finish Mop

Our NEW Great White® Flat Finish Mop is redesigned with an open mesh backing for an unrestricted flow-through to the floor. Finish can be poured through the Great White® flat finish mop onto the floor with no absorption by the mop.

Great White® flat finish mops offer these great benefits:

- No lint in your finish from the mop itself.
- Create more even coats for a more glossy initial finish.
- The fibers release finish more evenly and completely due to the yarn's lack of absorption.
- Less fatigue from the mop's lack of drag while applying finish.
- Works better than micro fiber finish mops that hold finish and add lint into your finish.
- Rinses clean in warm water and dries quickly.
- Compatible with Rubbermaid® Commercial Flow Finish System and Geerpres® Chemical Application System
